8.1

Algorithm

1.Start

2.Input the order n of the square matrices.

3.Input elements of Matrix A and Matrix B.

4.Create a result matrix R of size n × n and initialize all elements to 0.

5.Initialize loop variable i from 0 to n−1.

6.Inside that, initialize loop variable j from 0 to n−1.

7.Inside that, initialize loop variable k from 0 to n−1.

8.Perform multiplication and addition: If inside loops → R[i][j] = R[i][j] + A[i][k] × B[k][j]

9.Repeat until all loops finish.

10.Print the result matrix R.

11.Stop.

Flowchart

Start
Input n
Input A=[] and B=[]
Resultant Matrix R=0
i=0
i<n?
j=0
j<n
False
i=i+1
True
k=0
k<n?
False
j=j+1
False
R[i][j]=R[i][j]+A[i][k]*B[k][j]
k=k+1
Print Matrix R
Stop
