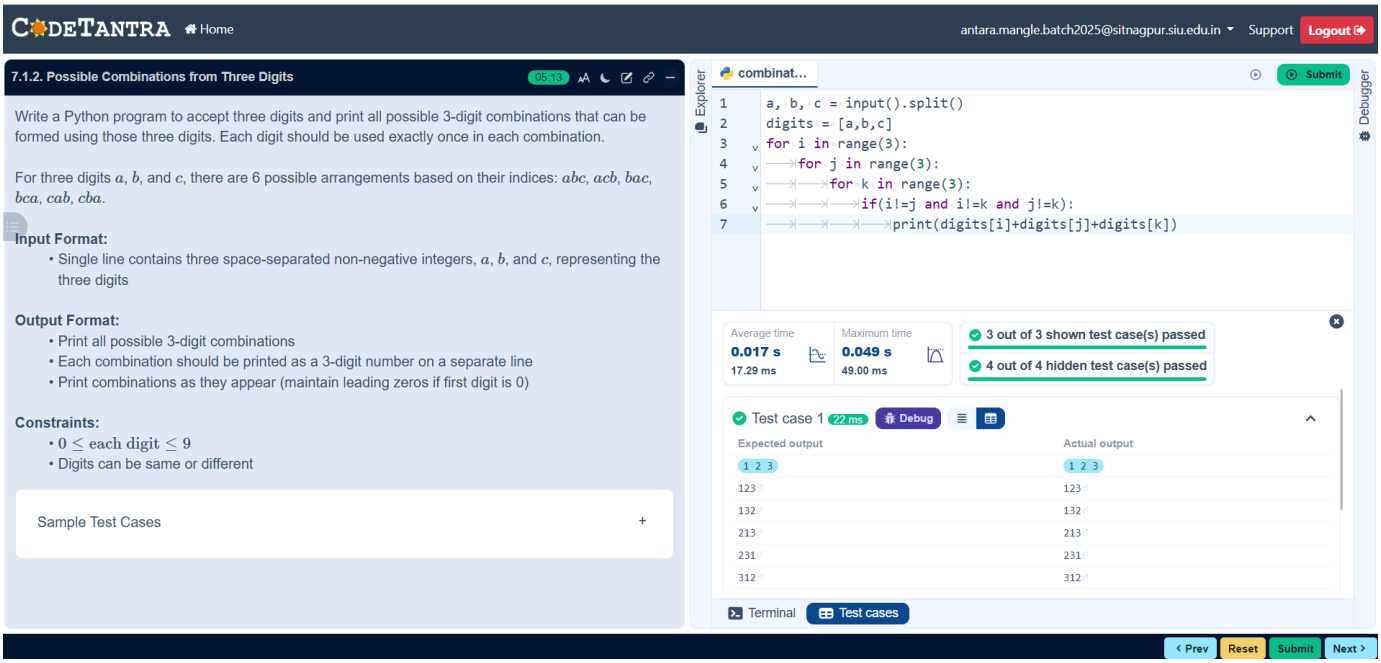
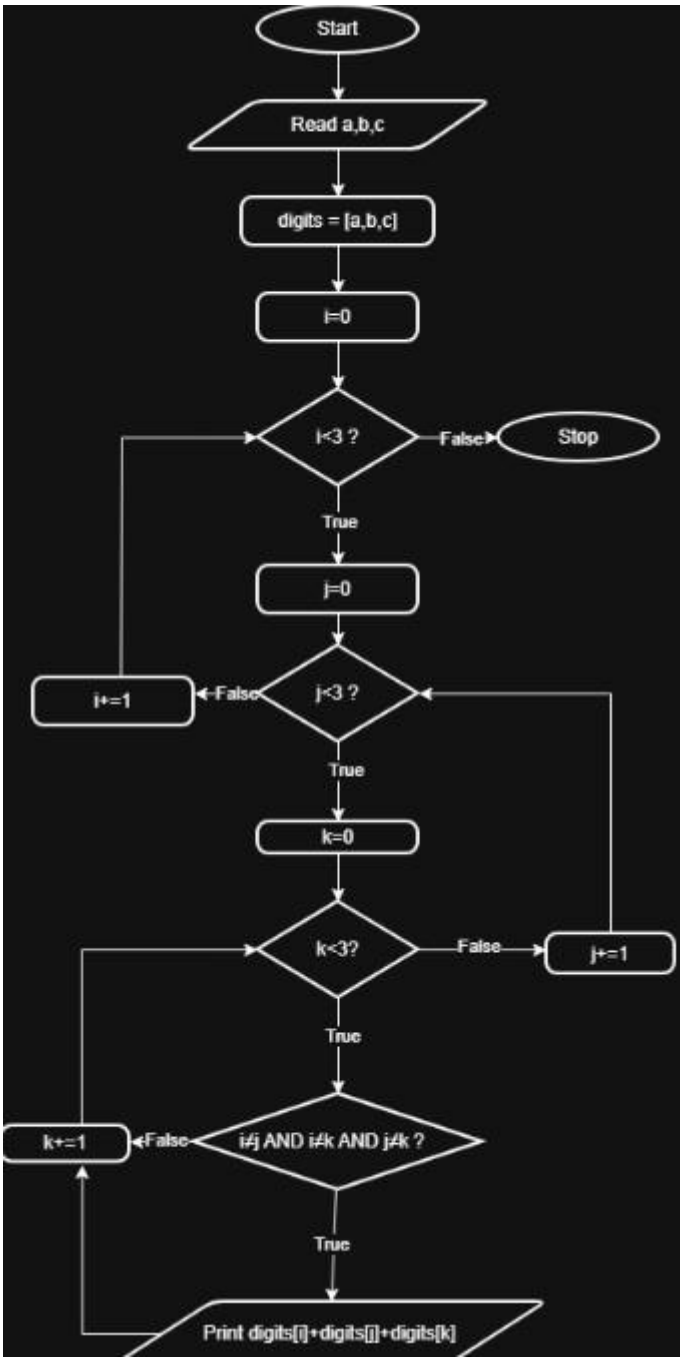
7.2



Algorithm

1. Start
2. Input three values a, b, c.
3. Store them in a list: digits = [a, b, c] 4. Initialize loop variable i from 0 to 2.
5. Inside that, initialize loop variable j from 0 to 2.
6. Inside that, initialize loop variable k from 0 to 2.
7. Check condition: if (i ≠ j AND i ≠ k AND j ≠ k) If true → Print digits[i] + digits[j] + digits[k]
8. Repeat until all loops finish.
9. Stop

Flowchart



Start
Read a,b,c
digits = [a,b,c]
i=0
i<3 ?
False
Stop
True
j=0
j<3 ?
False
i+=1
True
k=0
k<3?
False
j+=1
True
i≠j AND i≠k AND j≠k ?
False
k+=1
True
Print digits[i]+digits[j]+digits[k]
