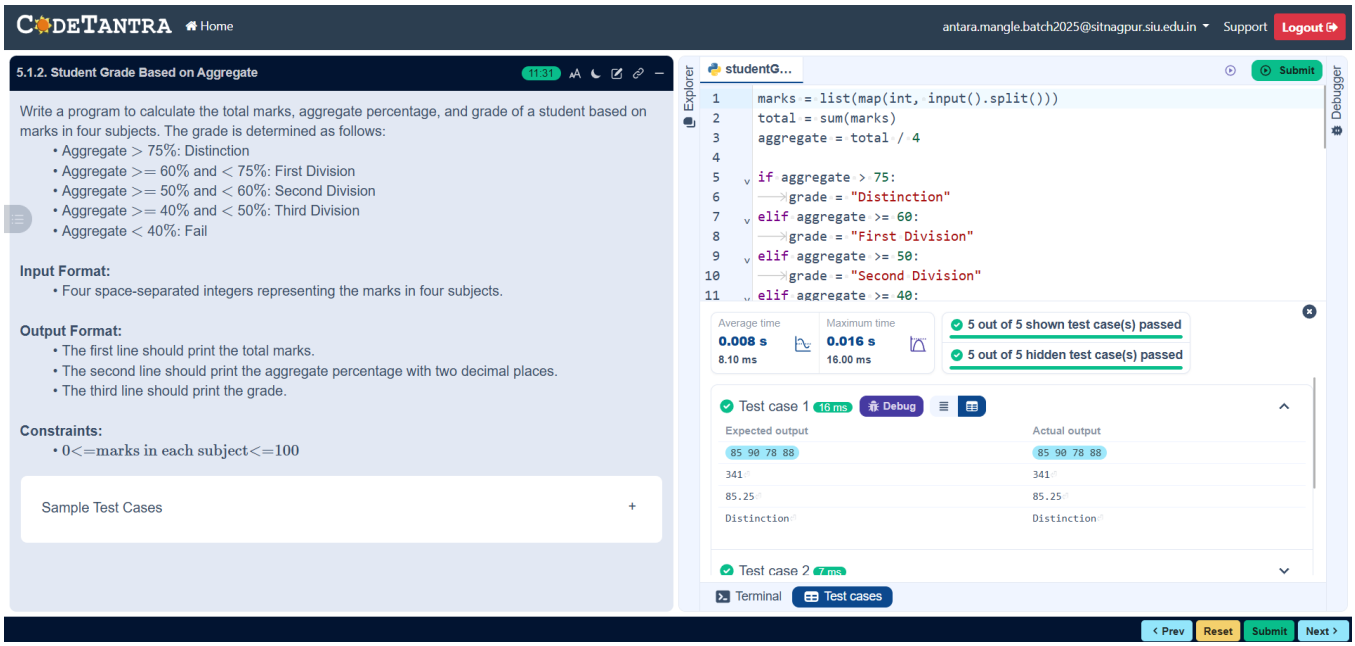
5.2

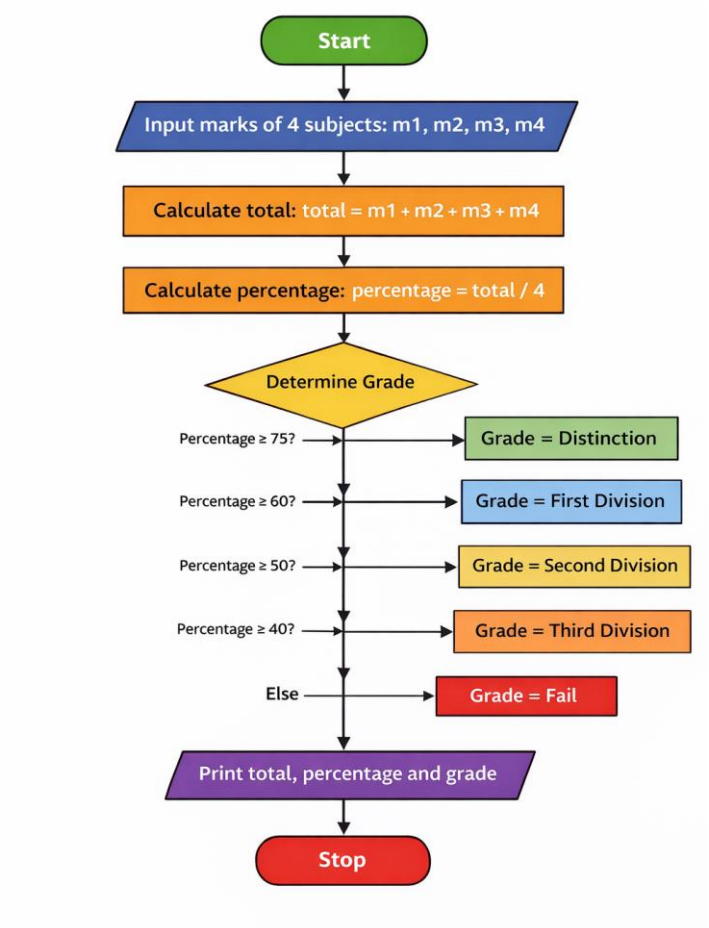


Algorithm

Step 1: Start
Step 2: Input marks of 4 subjects: m1, m2, m3, m4
Step 3: Calculate total:

- total = m1 + m2 + m3 + m4
  Step 4: Calculate percentage:
- percentage = total / 4
  Step 5: Determine grade:
- If percentage ≥ 75 → Grade = Distinction
- Else if percentage ≥ 60 → Grade = First Division
- Else if percentage ≥ 50 → Grade = Second Division
- Else if percentage ≥ 40 → Grade = Third Division
- Else → Grade = Fail
  Step 6: Print total, percentage, and grade
  Step 7: Stop

Flowchart



Start
Input marks of 4 subjects: m1, m2, m3, m4
Calculate total: total = m1 + m2 + m3 + m4
Calculate percentage: percentage = total / 4
Determine Grade
Percentage ≥ 75?
Grade = Distinction
Percentage ≥ 60?
Grade = First Division
Percentage ≥ 50?
Grade = Second Division
Percentage ≥ 40?
Grade = Third Division
Else
Grade = Fail
Print total, percentage and grade
Stop
