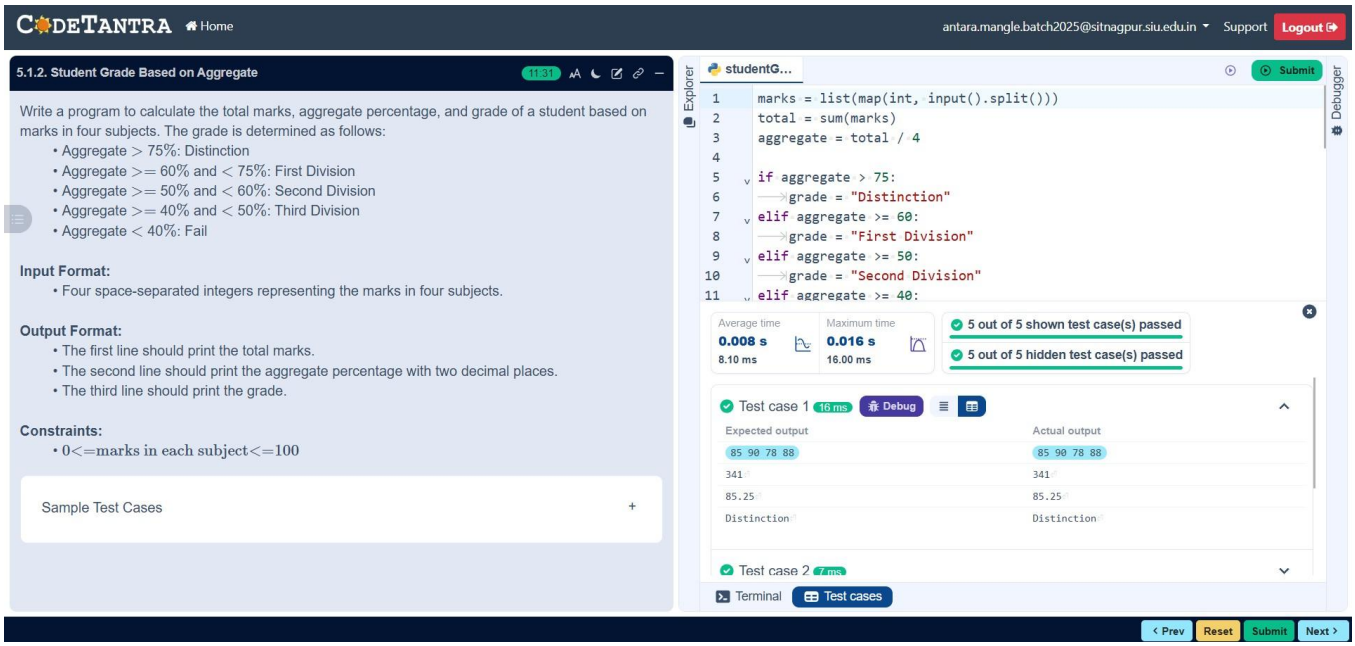
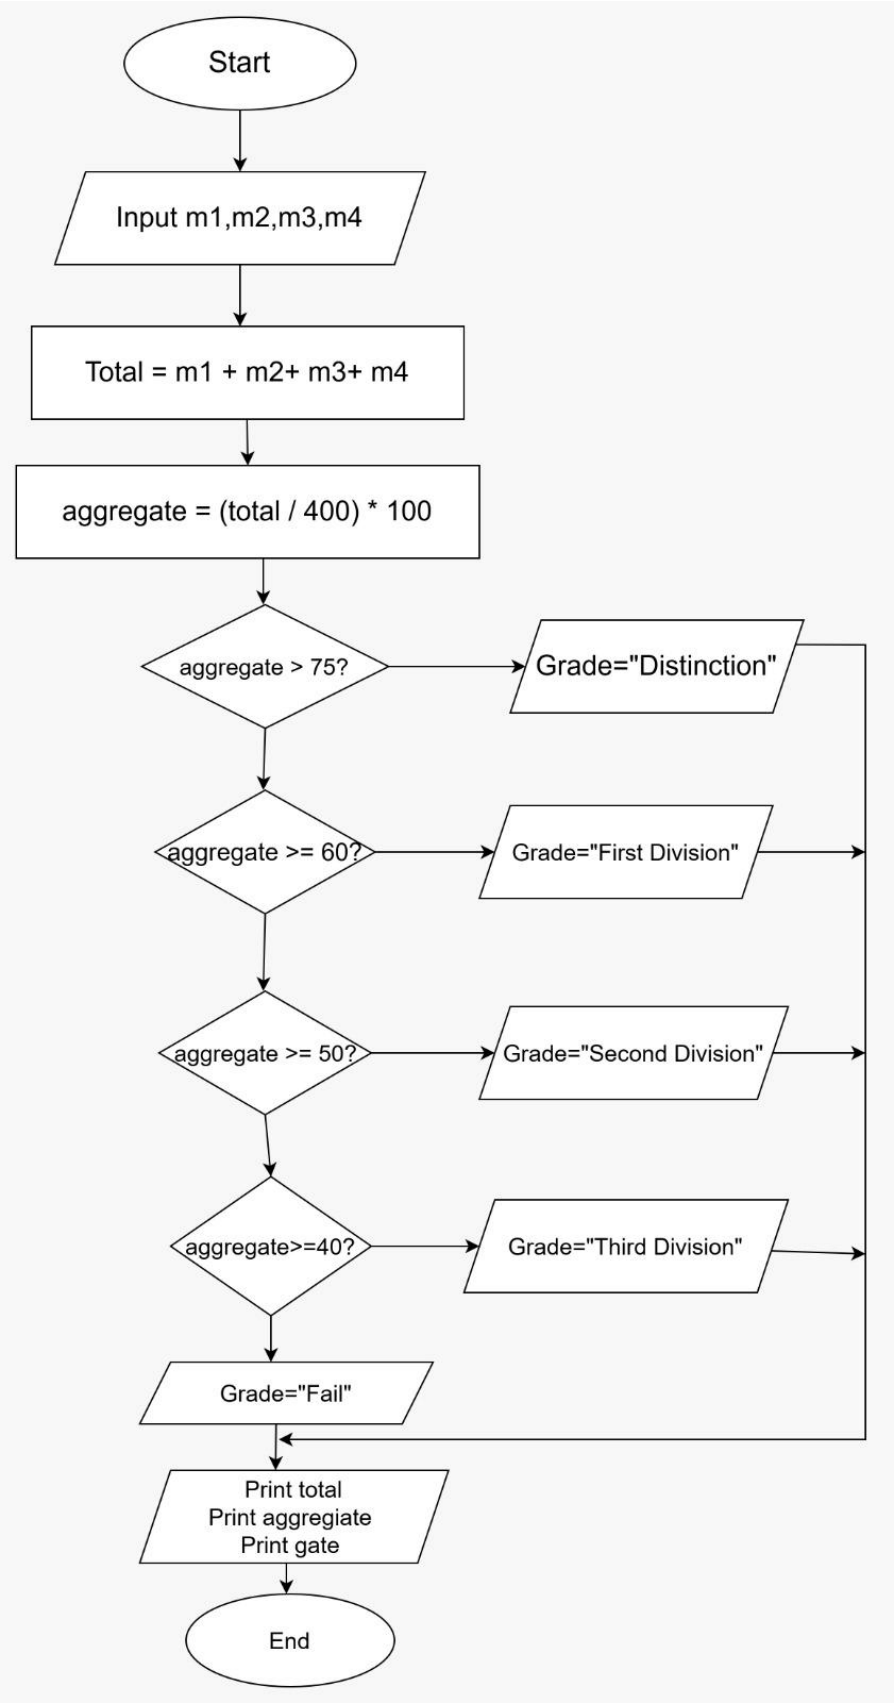
5.2



Algorithm

1. **Start**
2. **Read four marks: m1, m2, m3, m4**
3. **Calculate total marks:- total = m1 + m2 + m3 + m4**
4. **Calculate aggregate percentage percentage = total / 4**
5. **If percentage > 75 Print "Distinction"**
6. **Else if percentage >= 60 and percentage < 75 Print "First Division"**
7. **Else if percentage >= 50 and percentage < 60 Print "Second Division"**
8. **Else if percentage >= 40 and percentage < 50 Print "Third Division"**
9. **Else Print "Fail"**
10. **Print total marks**
11. **Print aggregate percentage**
12. **Stop.**

Flowchart



Start
Input m1,m2,m3,m4
Total = m1 + m2+ m3+ m4
aggregate = (total / 400) * 100
aggregate > 75?
Grade="Distinction"
aggregate >= 60?
Grade="First Division"
aggregate >= 50?
Grade="Second Division"
aggregate>=40?
Grade="Third Division"
Grade="Fail"
Print total
Print aggregiate
Print gate
End
